

# Birds of Merri Creek

## White-plumed Honeyeater

Photo: P. Mollison

These active small-medium birds have a loud, cheery 'chick o wee' call, and an urgent piping alarm call that alerts other birds about predators nearby. Their diet is insects from foliage or captured in flight, nectar and lerps. Found across inland Australia; mostly sedentary (stays in one location).

For more info about this bird, and to listen to the call scan the QR code or go to: [www.birdsinbackyards.net/species/Lichenostomus-penicillatus](http://www.birdsinbackyards.net/species/Lichenostomus-penicillatus)

Join Friends of Merri Creek bird surveys when COVID-19 restrictions are lifted. See our events calendar at: [www.friendsofmerriecreek.org.au](http://www.friendsofmerriecreek.org.au)
